

JOURNAL OF HEALTH, POPULATION AND NUTRITION

INFORMATION FOR CONTRIBUTORS

The peer-reviewed Journal of Health, Population and Nutrition (JHPN), incorporating the Journal of Diarrhoeal Diseases Research, is owned and published by icddr,b.

icddr,b became the focal point of the world's medical communities for developing oral rehydration therapy (ORT) which saves millions of lives each year. It is an independent, international, non-profit organization for research, education, training, clinical services, and information dissemination. Located in Dhaka, the capital city of Bangladesh, it is the only truly international health research institution based in a developing country. icddr,b is the first recipient of Gates Award for Global Health.

The vision of icddr,b is: Healthier people—Better lives through evidence-based solutions.

The mission of icddr,b is: We will help solve significant public health challenges facing the people of Bangladesh and beyond, especially the most vulnerable, through the generation of knowledge and its translation into policy and practice.

icddr,b's research activities now encompass a wide range of protocols with emphasis on nutrition, emerging and re-emerging infectious diseases, reproductive health, child health, case management, vaccine evaluation, population sciences, health and family-planning systems, poverty and health, HIV/AIDS, and environmental health.

SUBMISSION OF MANUSCRIPTS

Papers, written in English, are considered for publication and must be submitted online at www.jhpn.net. Copies of any permissions to reproduce published materials, to use illustrations or report-sensitive personal information of identifiable persons, or to name persons for their contributions should be sent separately to the JHPN Office.

While submitting the manuscript, written approval (either in black and white or by email) of all authors must as well be submitted. Authors may also suggest names of 3-5 potential experts for reviewing the manuscript.

MISSION

The mission of the Journal of Health, Population and Nutrition is to provide a forum for rapid pub-

lication of new findings on issues pertinent to maternal, child and family health and related issues of population and nutrition. The articles in the Journal do not deal primarily with child-survival issues but encompass all age-groups and stages of life, with emphasis on family health and development.

EDITORIAL POLICIES

The Journal of Health, Population and Nutrition has adopted the following editorial policies:

The Journal puts emphasis on speedy publication. Most articles are published within 4-6 months of acceptance. There is no absolute rule against articles primarily dealing with industrialized countries; however, preference is given to the articles dealing with issues of developing countries.

The manuscripts that are poorly written are returned without further examination. However, technical editing for grammatical flaws and inconsistency in style elements is done on the accepted papers.

Public-health professionals sometimes report lessons they have learnt from their experience. Often these are important lessons and may be reported in working papers and monographs. While these may be valuable, they may also be biased, and the data may not have sufficient reliability. The Journal prefers articles on studies that are well-designed and substantiated by adequate and reliable data.

To facilitate rapid publication of high-quality articles, the Journal has several section editors who review manuscripts in their areas of expertise. These sections include: Emerging Diseases; Health Systems; Immunization; Nutrition; Population; Reproductive and Neonatal Health; Water and Sanitation; Gender Health and Human Rights; Social Determinants of Health; Chronic Diseases (public-health aspects) and Case Studies.

The section headings may suggest narrowly-focused articles, but the Journal favours manuscripts that show interactions among different sections and cross-cutting of issues relating to broad aspects of health.

Type of papers published

The Journal publishes articles of authors from any part of the globe but has a special interest in publishing original research of relevance to developing countries. It publishes original research arti-

cles, review articles, commentaries, short reports, case studies, and letters on new findings (see Mission and Editorial policies above). Occasionally, the Journal carries an editorial perspective. The aim is to explore diverse perspectives and to offer opinions on controversial subjects. The Journal also publishes theme-based issues.

In principle, a review article should not generally exceed 8,500 words, and an original research article should also not exceed 6,500 words, including the abstract, tables, references, and other appendices. A commentary should not exceed 4,000 words. A short report and a case study should not exceed 2,500 words, including abstract, tables, and references. Letters should be brief (around 1,500 words) and to the point; tables can be included, but graphs and illustrations will not normally be used. References must be kept to a minimum.

Acceptance of paper

All decisions to accept, revise, or refuse a paper will be made by the editors.

Papers are accepted for publication provided these are submitted solely to the Journal of Health, Population and Nutrition and are subject to peer review and editorial revision.

Statements and opinions expressed in review articles, original papers, commentaries, short reports, letters, case studies, editorials, special issues, and supplements published in the Journal of Health, Population and Nutrition are of the author(s) and not necessarily of the editors or the publisher; the editors and the publisher disclaim any responsibility or liability for such material. Neither the editors nor the publisher guarantee, or endorse any products or services advertised in this publication, nor guarantee any claims made by the manufacturer of such product or service.

FREQUENCY OF PUBLICATION AND INDEXING INFORMATION

The Journal is published 4 times a year (March, June, September, and December). It is indexed/abstracted by the major international indexing systems, including the Current Contents: Clinical Medicine, Research Alert, SCI Expanded, SCI JCR, Index Medicus, PubMed/MEDLINE, POPLINE, Google Scholar, Elsevier Bibliographic Databases (Scopus, EMBiology, and EMCare), Cambridge Scientific Abstracts, CAB Abstracts, CAB Health, JSTOR, etc.

ELECTRONIC ACCESS

The Journal is available through the Internet on

<http://www.jhpn.net>, <http://www.who.int/hinari>, <http://www.bioline.org.br/hn>, <http://www.Free-MedicalJournals.com>, <http://www.doaj.org>, <http://www.openj-gate.com>, <http://www.portico.org>, and <http://www.inasp.info>.

PREPARATION OF MANUSCRIPTS

Manuscripts should be prepared using double-spacing throughout, including the title page, abstract, text, acknowledgements, references, tables, and legends for illustrations. Number pages consecutively, beginning with the title page.

Manuscripts must be accompanied with a covering letter. This must include: (a) information on prior or duplicate publication or submission of any part of the work elsewhere; (b) a statement that the manuscript has been read and approved by all authors (written approval must accompany); (c) the name, address, telephone, fax number, and email address of the first author and also the corresponding author who is responsible for communicating with other authors about revisions and final approval of the proofs.

Manuscripts based on clinical trials must accompany the clinical trial registration information.

Title page

The title page should carry: (a) the title of the article, which should be concise but informative; (b) a short running head or footline of no more than 40 characters placed at the foot of the title page; (c) first name, middle initial, and last name of each author, with highest academic degree(s), and institutional affiliation; (d) name of department(s) and institution(s) to which the work should be attributed; (e) disclaimers, if any; (f) sources of support in the form of grants, equipment, drugs, or all of these; (g) name and address of the first author and also the corresponding author responsible for correspondence; (h) name and address of the author to whom requests for reprints should be addressed or statement that reprints are not available from the author(s).

Authorship

All persons designated as authors must qualify for authorship. Each author should have participated sufficiently in the work to take public responsibility for the content of the article and has consented to be an author.

Authorship credit should be based only on substantial contributions to: (a) conception and design, or analysis and interpretation of data; (b) drafting the article or revising it critically for im-

portant intellectual content; and (c) final approval of the version to be published. Conditions (a), (b), and (c) must all be met. Participation solely in the acquisition of funding or collection of data does not justify authorship. General supervision of the research group is also not sufficient for authorship. Any parts of an article critical to its main conclusions must be the responsibility of at least one author.

The role of each author in the study/manuscript must be spelled out.

A paper with corporate (collective) authorship must specify the key persons responsible for the article; others contributing to the work should be recognized separately (see 'Acknowledgements').

Abstract and key words

The abstract of no more than 350 words should state the purposes of the study or investigation; basic procedures (selection of study subjects; observational and analytical methods); main findings (give specific data and their statistical significance, if possible); and the principal conclusions. Emphasize new and important aspects of the study or observations. Use only approved abbreviations.

Below the abstract, provide and identify as such 3 to 10 key words or short phrases that will assist indexers in cross-indexing the article and may be published with the abstract. Key words or short phrases should be sufficient to describe the content of the text. Use terms from the Medical Subject Headings (MeSH) list of the Index Medicus, published by the U.S. National Library of Medicine (NLM), USA; if suitable MeSH terms are not yet available for recently-introduced terms, present terms may be used.

Text

The text should be divided into sections with the following headings: Introduction, Materials and Methods, Results, and Discussion.

Introduction: The purpose(s) of the study should be clearly stated. Summarize the rationale for the study or observation. Give strictly pertinent references only, and do not review the subject extensively. Do not include data or conclusions from the work being reported.

Materials and methods: Describe your selection of the observational subjects clearly. Identify the methods, apparatus (names and addresses of manufacturers in parenthesis), and procedures in sufficient detail to allow other workers to reproduce the results. Give references to established meth-

ods, including statistical methods (see below); provide references and brief descriptions for methods that have been published but are not well-known; describe new or substantially-modified methods, give reasons for using them, and evaluate their limitations.

Ethics: When reporting experiments on human subjects, indicate whether the procedures followed were in accordance with the ethical standards of the committee on human experimentation of the institution in which the experiments were done or in accordance with the Helsinki Declaration. Do not use names of patients, initials, or hospital numbers, especially in any illustrative material. Please indicate which Institutional Review Board (IRB) approved the research and provided ethical clearance. When reporting experiments on animal subjects, indicate whether the institution's or the national research council's guide for, or any national law on, the care and use of laboratory animals was followed.

Statistics: Describe statistical methods with enough detail to enable a knowledgeable reader with access to the original data to verify the reported results. When possible, quantify findings and present them with appropriate indicators of measurement error or uncertainty (such as confidence interval). Avoid sole reliance on statistical hypothesis testing, such as the use of p value, which fails to convey important quantitative information. References for study design and statistical methods should be made to standard works (with pages stated) when possible rather than to papers where designs or methods were originally reported. Specify any general computer programmes used.

Include general descriptions of methods in the Materials and Methods section. When data are summarized in the Results section, specify the statistical methods used for analyzing them. Restrict tables and figures to those needed to explain the argument and to assess its support. Use graphs as an alternative to tables with many entries; do not duplicate data in graphs and tables. Avoid non-technical uses of technical terms in statistics, such as 'random' (which implies a randomizing device), 'normal', 'significant', 'correlations', and 'sample'. Define statistical terms, abbreviations, and most symbols used.

Clinical trial registration: For clinical trials, the name of the trial registration, registration number, and the URL of the registry must be included.

Results: Present results of your study in logical sequence in the text, tables, and illustrations. Do not repeat in the text all data in the tables or il-

illustrations, or both: emphasize or summarize only important observations.

Discussion: Emphasize the new and important aspects of the study and conclusions that follow from them. Highlight the important/major findings first, then highlight the less-important findings. Do not repeat in detail data or other material given in the Introduction section or the Results section. Include in the Discussion section the implications of the findings and their limitations, including implications for future research. Relate the observations to other relevant studies. Link the conclusions with the goals of the study but avoid unqualified statements and conclusions not completely supported by your data. Avoid claiming priority and alluding to work that has not been completed. State new hypotheses when warranted but clearly label them as such. Recommendations, when appropriate, may be included.

Acknowledgements: One or more statement(s) should specify: (a) contributions that need acknowledging but do not justify authorship, such as general support by a departmental chairman; (b) acknowledgements of technical help; (c) acknowledgements of financial and material support, specifying the nature of support; (d) financial or other relationships that may pose a conflict of interest.

Persons who have contributed intellectually to the paper but whose contributions do not justify authorship may be named and their function or contribution described. Such persons must have given their permission to be named. Authors are responsible for obtaining written permission from persons acknowledged by name because readers may infer their endorsement of the data and conclusions.

Technical help should be acknowledged in a paragraph separate from those acknowledging other contributions.

References: Number references consecutively in the order in which they are first mentioned in the text. Identify references in text, tables, and legends by arabic numerals in parentheses. References cited only in text, tables, or legends to figures should be numbered in accordance with a sequence established by the first identification in the text of the particular table or illustration. Use the style of the examples below, which are based on the formats used by the U.S. National Library of Medicine in the PubMed/Index Medicus. The titles of journals should be abbreviated according to the style used in the Index Medicus/PubMed. Consult the List of Journals Indexed in

the Index Medicus/PubMed. Try to avoid using abstracts as references; 'unpublished observations' and 'personal communications' must not be used as references, although references to written, not oral, communications may be inserted (in parenthesis) in the text. Include among the references papers accepted but not yet published, designate the journal, mention the year, and add 'in press' (in parenthesis).

The references must be verified by the author(s) against the original documents. Examples of correct forms of some references are given here.

EXAMPLES OF CORRECT FORMS OF REFERENCES

Journals

(1) *Standard journal article (list all authors when six or less; when seven or more, list only first six and add et al. in italics)*

Tables

Type each table double spaced on a separate sheet. Do not submit tables as photographs. Number tables consecutively and use a brief title

for each. Mention in each column a short or abbreviated heading. Place explanatory matter in footnotes, not in the heading. Explain in footnotes all non-standard abbreviations that are used in each table. For footnotes, use these symbols in this sequence: *, †, ‡, ¶, §, **, ††, ‡‡, etc. Identify statistical measures of variations, such as standard deviation (SD) and standard error of the mean (SEM). Internal vertical rules should not be used. Cite each table in the text in consecutive order. If you use data from another published or unpublished source, obtain permission, acknowledge fully, and submit permission obtained.

Illustrations and legends for illustrations

Illustrations

Figures should be professionally drawn. Letters, numbers, and symbols should be clear and even throughout. Titles and detailed explanations should belong in the legends for illustrations, not on the illustrations themselves.

Photomicrographs may have internal scale markers. Symbols, arrows, or letters used in the photomicrographs should contrast with the background.

If photographs of persons are used, either the subjects must not be identifiable or their pictures must be accompanied by written permission to use the photographs.

Figures should be numbered consecutively according to the order in which they have been first cited in the text. If a figure or a table has been published, acknowledge the original source, and submit written permission from the copyright holder to reproduce the materials. Permission is required, regardless of authorship or ownership by virtue of being the publisher, except for documents in the public domain. Colour photographs are not encouraged. But, if necessary, colour photographs can be reproduced if paid by the author.

Legends for illustrations

Type legends for illustrations double-spaced, with arabic numerals corresponding to the illustrations. When symbols, arrows, numbers, or letters are used for identifying parts of the illustrations, identify and explain each one clearly in the legend. Explain the internal scale, and identify method of staining in photomicrographs.

Units of measurements

Measurements of length, height, weight, and volume should be reported in metric units (metre, kilogramme, litre) or their decimal multiples. Temperature should be given in degrees Celsius (e.g. 37 °C). Editors may request that alternative or non-SI units be added by the authors before publication.

Abbreviations and symbols

Use only standard abbreviations. Avoid abbreviations in the title and abstract. The full term for which an abbreviation stands should precede its first use in the text unless it is a standard unit of measurement.

For further information, authors are referred to: "Uniform requirements for manuscripts submitted to biomedical journals" prepared by the International Committee of Medical Journal Editors. (<http://www.icmje.org>).

COPYRIGHT

Manuscripts submitted for publication in the Journal of Health, Population and Nutrition must not have been previously submitted or published. Accepted papers become the permanent property of the Journal of Health, Population and Nutrition of icddr,b. By submitting a manuscript, the author(s) agree that copyrights for their articles are automatically transferred to icddr,b, if and when the articles are accepted for publication.

The copyright gives the publisher (icddr,b) of the Journal of Health, Population and Nutrition the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microforms, or any other reproductions of similar nature, and translations.

The Article-Fee Code on the first page of an article in this journal indicates the consent of icddr,b that copies may be made for personal or internal use, provided the stated fee for copying is paid through the Copyright Clearance Center, Inc. (222 Rosewood Drive, Danvers, Massachusetts 01923, USA. Fax (508) 750-4744). The copyright owner's consent does not, however, extend to copyright for general distribution, for promo-

tion, for creating new works, or for resale. Specific written permission must be obtained from icddr,b for such copying.

The use, in this journal, of registered trade names, trademarks, etc. without special acknowledgement does not imply that such names, as defined by the relevant protection laws, be regarded as unprotected, and, thus, free for general use.

GALLEY PROOFS

Uncorrected galley-proofs will be sent to the corresponding author for return within 48-72 hours. It is the author's responsibility to ensure the accuracy of these proofs. Correction other than printing errors should be kept to a bare minimum. Rewriting is totally unacceptable.

REPRINTS

No free reprints will be supplied to the authors for their articles published in the JHPN. The principal/corresponding author of a particular article will get only one copy of the journal issue containing the article.

Reprints may be ordered at the time when corrected proofs are returned. The order form with ordering procedures and price list will be sent to the corresponding author with the galley-proof. Payment must be made upon receipt of an invoice from the publisher, if a cheque for correct amount is not sent when returning the galley.

ADVERTISEMENTS

Correspondence should be addressed to:

Managing Editor
Journal of Health, Population and Nutrition

GPO Box 128, Dhaka 1000, Bangladesh
Street address: 68 Shaheed Tajuddin Ahmed
Sarani, Mohakhali, Dhaka 1212, Bangladesh
Fax: (880-2) 881 9133
Email: sim@icddr.org; jhpn@icddr.org

CHANGE OF ADDRESS

Allow six weeks for all changes to become effective. All communications should include both old and new addresses.

Frequently-asked questions (FAQs) by Subscribers/Agents!!!

- Full title of the journal: **Journal of Health, Population and Nutrition [ISSN 1606-0997 (print); ISSN 2072 1315 (online)]**
- Short title: **JHPN**
- Language: **English**
- Publication frequency: **Quarterly, i.e. 4 issues a year (March, June, September, and December)**
- Has the journal changed its name recently? **Yes (Formerly Journal of Diarrhoeal Diseases Research)**
- Ordering restriction? **No ordering restriction. Subscription order may be sent anytime but must be for a full calendar year**
- Can subscription begin from any issue of any volume? **No, only for a full calendar year, but a single issue can be purchased**
- What about bulk order and back issues? **Bulk order and back issue are accepted upon availability. 20% discount is allowed for ordering 5 copies or more. The back issues are charged based on the current subscription rates**
- Are all issues identified by volume and issue numbers? **Yes**
- Any supplements published? **Yes**
- Currency for payment? **US dollar (US\$), UK pound sterling (UK£), Euro, or Taka (Taka for Bangladeshi subscribers only)**
- Discount for subscription agencies? **20% discount is allowed for subscription agents**
- Payment policy? **Prepayment is required. No credit cards are acceptable**
- How should the payment be made? **Payment may be made through Cheque/Bank Draft/ Pay Order drawn on any bank in Bangladesh, USA, or UK and be made in favour of the “International Centre for Diarrhoeal Disease Research, Bangladesh”. Payment can also be made through wire-transfer (please mention “JHPN subscription” in the advice)**
- Mailing method? **All issues are mailed by air (except Bangladesh)**
- Claim policy? **Claim may be accepted via e-mail, fax, and/or mail. Claim for missing issues must be made within 90 days**
- How many days does it take to start up a new subscription and to begin supply? **15 days if the desired issues of the volume are already published**
- Can subscription be cancelled once paid for a particular year and fees refunded anytime? **No**
- Is electronic format available for this title? **Yes, available on the Internet (www.jhpn.net) but not in CD-ROM format**
- With whom to correspond regarding subscriptions and advertisements?
